WELCOME TO OFFCUT SHADES

WHO WE ARE

Off Cut Shades uses only one manufacturer, Sun Glow Window Covering Products of Canada LTD. who have been serving the window treatment market since 1983. This allows us to bring to you Canadian made craftsmanship directly from the factory. At Off Cut Shades, our goal and commitment is to provide a simple alternative to a complicated shopping experience. When shopping online, select from our curated collection or design your own shade with our easy to use shade builder. Our in house design team expertly configured various shade options so you don't have to. If in-person suits you better, come to our showroom where our expert team can walk you through every step, including measure & installation. No matter your shopping style you will experience fast & reliable lead times.

## ROLLER SHADES

Our roller shades are more than just window coverings; they are a reflection of your unique taste and personality. Discover the beauty and simplicity with our easy-to-use roller shade systems. Effortlessly adjust the level of light and privacy with smooth and precise operation.

## BANDED SHADES

These innovative window treatments combine the functionality of blinds with the softness of shades, creating a unique and contemporary look. With their sleek horizontal bands of alternating sheer and solid fabrics, banded shades allow you to effortlessly control light and privacy while adding a touch of sophistication to any room.

## SHEER SHADES

Our sheer shades offer a stunning combination of light control, privacy, and style. These window treatments feature a unique design with delicate sheer fabric vanes suspended between two layers of soft, light-filtering fabric. When desired, simply adjust the vanes to align for enhanced privacy or tilt them to control the amount of light entering your space.

## PANEL TRACKS

The Panel Track system boasts impressive flexibility, allowing you to customize the width of each panel to suit your specific needs.

Whether you prefer a symmetrical or asymmetrical arrangement, the panels can be configured to open from the left, right, or even split down the center. This adaptability ensures that you can effortlessly control the amount of natural light and privacy that enters your living space, creating the ideal ambiance for any occasion.

## DUAL SHADES

There's no single roller shade that can give you softly filtered daylight, pure darkness for deep sleep, views during the day, and privacy at night. Since dual shades feature two distinct shades in one compact system, you don't have to compromise your fabric selection. Both shades are concealed behind our coated aluminum Dual Square Fascia for a clean and sleek look.

With the unique design of dual shades, you have the freedom to choose from two distinct fabric panels that alternate or align to create different effects.

Whether you desire soft diffused light, gentle privacy, or complete darkness, our Dual Shades adapt to your needs, ensuring the perfect ambiance for any time of the day.

## ROMAN SHADES

Roman Shades effortlessly create an elegant ambiance, even when fully retracted. Whether you're looking to enhance a living room, bedroom, or any other space, these shades bring a refined and polished feel to any environment.

## SAFETY SHIELD

Crafted with a strong emphasis on ensuring the safety of children, Off Cut Shades has taken into consideration that window coverings can pose potential risks. Our commitment to safeguarding homes with infants and young children is paramount. To address this concern, we have created an extensive selection of products aimed at minimizing the chance of accidents.

Our Safety Shield allows the use of chains while taking away the risk of accidents. In addition, we provide an array of innovative chainless choices that enhance child safety.

## ARIA SHADES

Unlike other Off Cut Shades™ systems, the Aria Chainless Shade has its own distinct operating system and valance. Simply pull the shade down to the desired height by the bottom bar. The shade can easily be retracted by a slight pull of the bottom bar or blind pull.

Our new speed reducer/spring technology, designed to deliver a seamless slow rise experience. Experience the convenience of on-site upper limit adjustment without compromising spring tension.

## ZERO GRAVITY

Paired with our roller system components, Zero Gravity perfectly balances the weight of the blind, no matter what size of fabric weight for virtually effortless operation. For high out of reach windows, a clip and retractable wand are available.

## NEO™ SHADES

The NEO™ Chainless System is an Off Cut Shades innovation that allows shades to be pulled down by the bottom bar or shade pull, and smoothly retracted with a light tug.

## NEO EZ PUMP SHADES

It's simple and seamless to operate Off Cut Shades Neo EZ Pump Shade System. Use the wand to lower the shade, then a light tug is all it takes to smoothly raise the shade.

## NIMBUS SKYLIGHT SHADES

With complete control over daylight at any angle, The Nimbus System helps you maintain comfortable temperatures year-round. Available only as a motorized system.

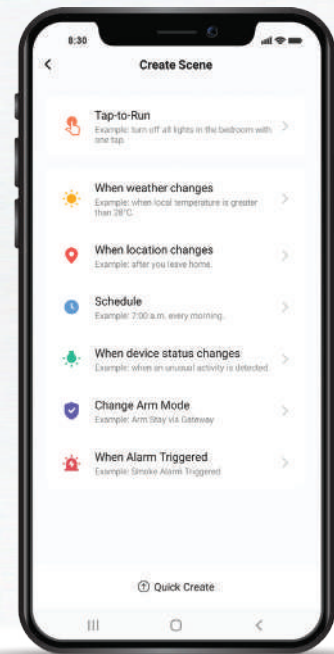

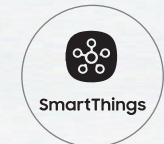

## ATLAS BOTTOM UP SHADES

By simply inverting the roller shade, Atlas finds new harmony and balance between daylight and personal privacy. Covering windows from the bottom up obscures sight lines, and the top opening permits the warmth and radiance of natural light.

# STEALTH AUTOMATION

Our Stealth Automation products feature robust motors with bi-directional communication, solar power, and smart home integration. Our motors make home automation simple and affordable. The new Zigbee 3.0 protocol enables WiFi based control via the Smart Life app for intuitive smart home control.

# SOMFY AUTOMATION

We carry the full range of Somfy systems, accessories, and components. Our Somfy experts advise and support our clients all the way from selection to implementation.

## TRIMS & PULLS

Off Cut Shades exclusive collection of designer shade accessories including trims and pulls let you add unique flair and personality to any of our shades. Coordinated pairings of trims and pulls.

## EXPRESSIONS WALLPAPER

Whether you want to print a mural, a unique pattern, or create a truly personalized look, Offcut Shades digital printing solutions can help your vision come to life.

## GRAPHIC SHADES

Whether you want to utilize window space for additional marketing space, or obtain a truly personalized look for your home, Offcut Shades digital printing solutions can help your vision come to life.

## INTERLUDE FABRICS

Interlude fabrics let in illuminating light throughout the day or block it for privacy and comfort. Effortlessly control your desired amount of light by simply raising or lowering the bands of sheer and translucent fabric.

Interlude fabrics are the ideal solution for Venetian elegance fused with the comfort and simplicity of roller shades. They are available in various options, including Blackout, Privacy, Translucent, and Transparent. You can choose the fabric that best suits your needs and preferences from these different options.

Available in: **15 SERIES / 56 COLOURS**

## TRANSPARENT FABRICS

Our extensive range of see-through fabrics provides a wide array of choices for decorating purposes. Our collection includes linen, textured, sunscreen-like fabrics, all of which offer clear views to the outside and a gentle diffusion of natural light.

These fabrics are particularly ideal for windows facing the north, as they allow ample natural light to enter. Moreover, they beautifully harmonize with drapes, providing a touch of warmth when the drapes are open and ensuring privacy when they are closed.

Available in:  
**6 SERIES / 23 COLOURS**

## TRANSLUCENT FABRICS

These fabrics create a warm and intimate ambience in your space, allowing the gentle glow of daylight to permeate while maintaining a sense of seclusion. The light-filtering materials used in these shades soften diffuse incoming sunlight, creating a gentle, ambient lighting effect. This can help create a more comfortable and inviting atmosphere in your space. At night with the lights on, only silhouettes can be seen from the outside. Translucent fabrics also help to protect your furniture, flooring, and other interior elements from fading or discoloration caused by prolonged sun exposure.

Available in:  
**8 SERIES / 37 COLOURS**

## PRIVACY FABRICS

Privacy shades are an excellent choice for bedrooms, bathrooms, or any area where your windows face the street or neighboring properties.

Our collection includes a variety of patterns, tone-on-tone designs, multi-tone options, solid colors, and textures, ensuring that you can find the perfect fabric that suits your preferences. These privacy fabrics serve a dual purpose by providing privacy while effectively blocking sunlight. Although a slight amount of light will be visible, there will be no visibility from the outside or inside.

Available in:  
**19 SERIES / 58 COLOURS**

## BLACKOUT FABRICS

They are specially constructed with multiple layers that prevent light from passing through. Opaque or blackout fabrics can create a nearly pitch-dark environment, making them ideal for bedrooms, home theatres, or any space where light control is essential.

The dense layers of materials not only block light but also act as an insulating barrier against heat transfer. This insulation helps to maintain a comfortable indoor temperature by reducing heat gain during hot weather and heat loss during colder seasons. As a result, blackout fabrics can contribute to energy efficiency by reducing the need for excessive heating or cooling.

Available in: **19 SERIES / 72 COLOURS**

## SUNSCREEN FABRICS

Sunscreen fabrics are performance or technical fabrics which give the ultimate control over the natural light. Our broad range of sunscreens make them appropriate for any application. Whether your goal is reducing solar heat gain, protecting interiors against damaging UV, or improving the comfort of any interior space through glare control or temperature control, sunscreens are the solution. Sun screens also allow various degrees of outward visibility through different weaves and openesses. Sunscreens are available in 1%, 3%, and 5% openesses meaning that they block 99%, 97%, and 95% respectively of the sun's rays from entering the interior and the inverse with respect to outward visibility. There is better outward visibility with a 5% openness, less so with a 1% openness.

Available in:

**10 SERIES / 63 COLOURS**

## SUSTAINABLE FABRICS

Our sustainable fabrics have the environment in mind as they are made from sustainable and energy efficient fabrics. Our sustainable collection contains no PVC and the fabrics are made of Trevira CS, an inherently fire-retardant fabric. They are performance fabrics with all the qualities of a sunscreen and the look of an elegant fabric – the perfect fusion between functionality and aesthetics. Some of these fabrics are available with metalized backing for extra efficiency. Eco/sustainable fabrics are the primary choice of designers and architects for their sustainability, functionality, and beauty.

Available in:  
**5 SERIES / 22 COLOURS**

# VISIT OUR SHOWROOM

---

Our Toronto Showroom represents the artistic and innovative vision behind Off Cut Shades. We offer a firsthand experience exploring a wide range of options and styles to enhance the aesthetics and functionality of your windows. You'll find displays featuring different materials, patterns, colors, and textures, enabling you to visualize how each window covering will look in your own home. Knowledgeable staff members will assist you throughout. Our staff will guide you through the different types of window coverings, explain their features, and answer any questions you may have.
